

## what the heck is a social store?

Brandize stores add social context to your digital persona. Integrated directly into a Facebook Page or website, your fans can personalize products featuring your graphics or photos with their own name, a dedication and a signature. You can also turn off the Autograph resulting in more traditional licensed products. Either way a Brandize store is a great way to monetize your social media & web environments or raise money for your favorite cause.

## what about the customer experience?

Our Technology is simple & seamless. No complicated virtual design tools, just a few clicks and done.

- 1) Pick a product category from the home page
- 2) Select your product type or model
- 3) Pick your favorite image from the library
- 4) Reposition images & other elements if desired
